Assignment 10: SQL String & Pattern Matching

Overview:

Use SQL string functions and pattern matching to filter and search text fields across an Employees table.

1. Create and Populate Table

```sql
CREATE TABLE Employees (
  EmpID INT PRIMARY KEY,
  Name VARCHAR(50),
  Department VARCHAR(50),
  Email VARCHAR(50)
);
INSERT INTO Employees (EmpID, Name, Department, Email) VALUES
  (1, 'Alice Johnson',  'HR',      'alice.johnson@example.com'),
  (2, 'Bob Smith',      'IT',      'bob.smith@example.com'),
  (3, 'Charlie Brown',  'Finance','charlie.brown@example.com'),
  (4, 'Diana Prince',   'HR',      'diana.prince@example.com'),
  (5, 'Eve Adams',      'IT',      'eve.adams@example.org');
```

Submission Type : Write the SQL query in the **PDF/Doc/Word** file and Take a screenshot of this part Output **(as screenshot_1)** and save it in the same **PDF/Doc/Word** file.

2. SQL Query Tasks

1. **a) @example.com Emails:** List employees with emails in the example.com domain.

SQL:

```
SELECT Name, Email FROM Employees WHERE Email LIKE '%@example.com';
```

Submission Type : *Write the SQL query in the **PDF/Doc/Word** file and Take a screenshot of this part Output **(as screenshot_2a)** and save it in the same **PDF/Doc/Word** file.*

2. **b) Names Starting with 'A':** Select employees whose names start with 'A'.

SQL:

```
SELECT Name FROM Employees WHERE Name LIKE 'A%';
```

Submission Type : *Write the SQL query in the **PDF/Doc/Word** file and Take a screenshot of this part Output **(as screenshot_2b)** and save it in the same **PDF/Doc/Word** file.*

3. **c) Names Ending with 'son':** Find employees whose names end with 'son'.
SQL:
SELECT Name FROM Employees WHERE Name LIKE '%son';

Submission Type : *Write the SQL query in the* ***PDF/Doc/Word*** *file and Take a screenshot of this part Output* ***(as screenshot_2c)*** *and save it in the same* ***PDF/Doc/Word*** *file.*

4. **d) Second Letter 'v':** Retrieve employees whose second character in the name is 'v'.
SQL:
SELECT Name FROM Employees WHERE SUBSTRING(Name, 2, 1) = 'v';

Submission Type : *Write the SQL query in the* ***PDF/Doc/Word*** *file and Take a screenshot of this part Output* ***(as screenshot_2d)*** *and save it in the same* ***PDF/Doc/Word*** *file.*

5. **e) Departments Containing 'IT':** Select employees in departments containing 'IT'.
SQL:
SELECT Name, Department FROM Employees WHERE Department LIKE '%IT%';

Submission Type : *Write the SQL query in the* ***PDF/Doc/Word*** *file and Take a screenshot of this part Output* ***(as screenshot_2e)*** *and save it in the same* ***PDF/Doc/Word*** *file.*

6. **f) Case-Insensitive 'hr':** Find employees in departments with 'hr' regardless of case.
SQL:
SELECT Name, Department FROM Employees WHERE LOWER(Department) LIKE '%hr%';

Submission Type : *Write the SQL query in the* ***PDF/Doc/Word*** *file and Take a screenshot of this part Output* ***(as screenshot_2f)*** *and save it in the same* ***PDF/Doc/Word*** *file.*

Submission Guidelines:

Create One Main Folder (named Assignment10_YourName) which includes -

- One **Doc/PDF/Word** file containing all the Queries and the screenshots of each part.
- Put your SQL file as **Assignment10_YourName.sql**

Convert the folder into ZIP format.
Upload the ZIP folder on the submission portal.

Watch this to learn how to create ZIP file
